DETAILED ACTION
EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Cahill on 25 August 2006.

The application has been amended as follows:

- On line 1 of claim 16, the phrase "The saber of claim 1" has been replaced with --The saber of claim 12--.

The amendments to the specification incorporate errors that do not correctly show the amendment and 2 amended claims feature an incorrect status identifier. These errors have been corrected by examiner's amendment below.

- On page 2 of the response received 8/16/06, applicant submitted a replacement paragraph to the specification with added portions not underlined. That paragraph has been replaced with a correctly marked up copy below:

--The length of blade 12 ~~may~~ should be at least 20 inches. In practice, the blade length would be in the range of 24 to 48 inches. Representative blade cross section dimensions are, at the hilt, on the order of 1.5 inches along vertical axis 30 from edge 24 to convex side 26 and on the order of 1.5 inches along a horizontal axis 32 between concave side edges 21 and 23.--.

- Claims 1 and 11 incorporate an incorrect status identifier of (previously amended). The status identifiers of both claims 1 and 11 has been changed to (currently amended).

Allowable Subject Matter

2. Claims 1-5, 7, 11-14, and 16 are allowed.
3. The following is an examiner's statement of reasons for allowance: Claims 1-5, 7, 11-14, and 16 are allowable because of the saber apparatus with a generally triangular cross section having first and second deep concave sides, and a distance between respective first edges on the order of 1.5 inches as set forth in the claims. None of the prior art cited discloses a saber that incorporates a generally triangular cross section having first and second deep concave sides, and a distance between respective first edges on the order of 1.5 inches to give the saber a clubbing feature and a cutting feature. Therefore, in view of what has been stated above, the claims are allowable over the art of record.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
